

Devil's Fig (*Solanum torvum*) The Devil's Fig is a large shrub occasionally seen on the edges of fairways, such as LHS Gold 8, whose seeds (see below) are also spread by birds.

Elastic Grass (*Eragrostis tenuifolia*) This introduced African grass weed is low-growing and occasional along pathways and in turf areas.

Fireweed (*Senecio madagascariensis*) A garden escape, the Madagascan Fireweeds can be seen in garden areas, with flower close-up below.

Flaxleaf Fleabane (*Conyza bonariensis*) This pan-tropical herb produces many seeds that are wind-dispersed and is widespread across our site.

Giant Reed (*Arundo donax*) This very tall grass is a prominent weed along the banks of the Brisbane River, including Indooroopilly Island, with close-up of leaves below.

Glycine (*Neonotonia wightii*) This introduced Asian vine is a prominent weed growing on shrubs and small trees along the banks of the Brisbane River.

Green Amaranth (*Amaranthus viridis*) This Central American weed is often seen near ponds, with flower close-up below.

Green Cestrum (*Cestrum parqui*) This introduced Tropical American shrub is an occasional weed growing in garden areas near Gold 9 tee-block.

Groundsel Bush (*Baccharis halimifolia*) This introduced American shrub was removed (extirpated) from the RHS of Green 8 fairway but recently observed along the Riverbank.

Guava (*Psidium guajava*) This introduced Asian shrub or small tree can be observed in various garden areas including on the LHS Red 9 tee-blocks. A close-up of leaves & flowers (Summer) is provided below.

Guinea Grass or Green Panic (*Megathyrsus maximus*) This introduced tall African grass is an occasional weed growing in garden areas near Red 6 and 7.

Hyssop Spurge (*Chamaesyce hyssopifolia*) This low-growing Mediterranean herb is an occasional weed growing in garden areas, with close-up below.

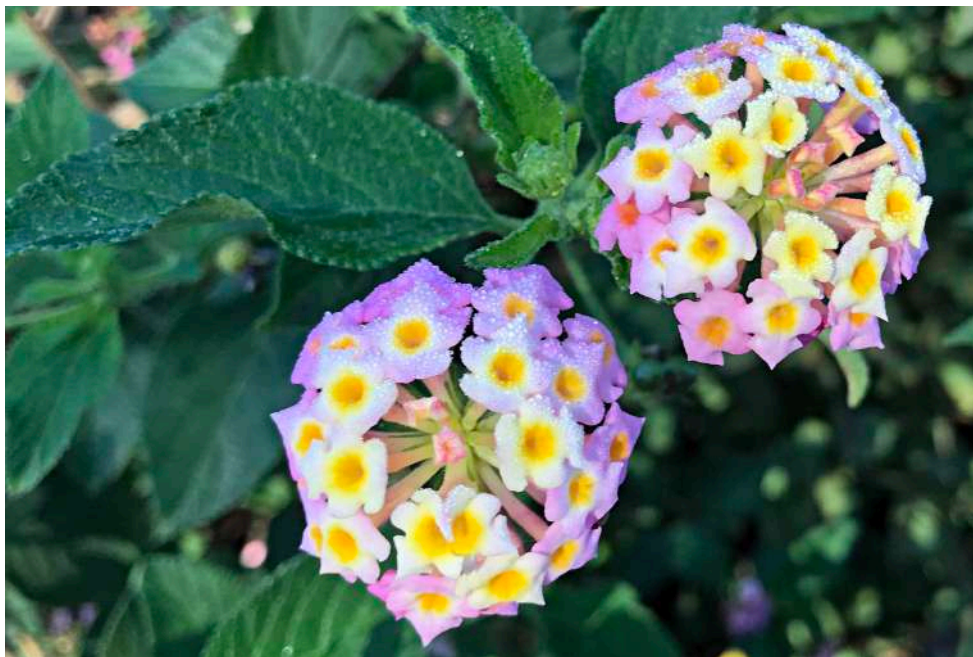

Indian Mustard (*Brassica x juncea*) This aromatic herb was observed in garden beds on the Red nine.

Inkweed (*Phytolacca octandra*) This toxic Central american herb was observed in garden beds on the Gold nine.

Lantana (*Lantana camara*) This pan-tropical shrubby weed was observed among other shrubs in the Maintenance Facility screening, with flower close-up below.

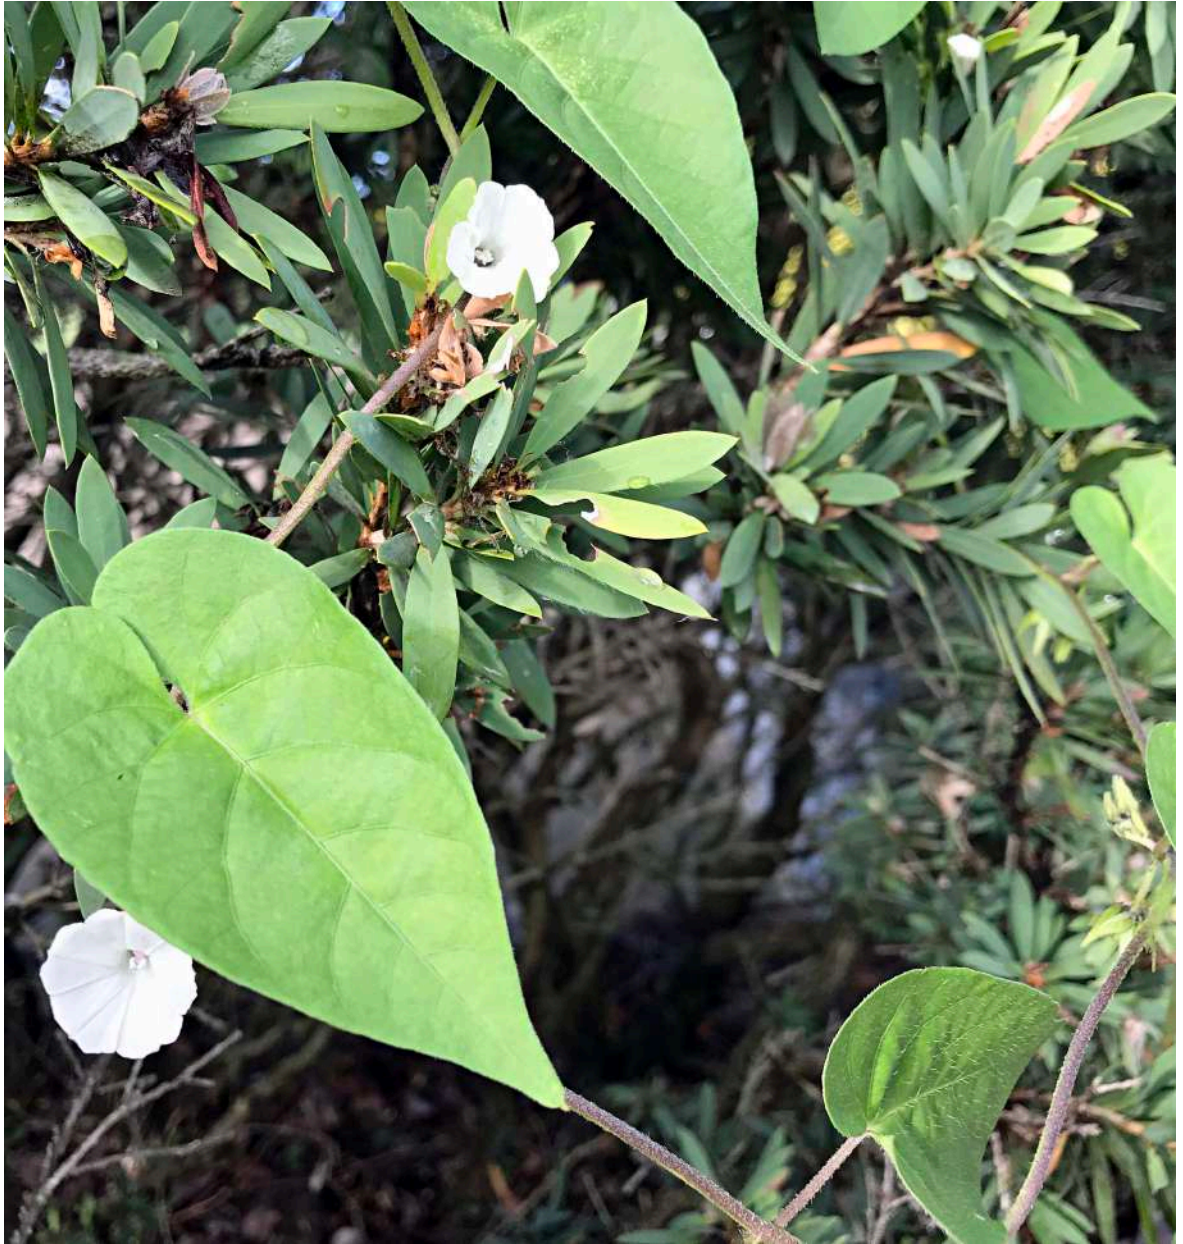

Leucaena (*Leucaena leucocephala*) This tall Central American shrub is an agricultural escape (cattle feed species) growing along the Riverbanks near Gold 3.

Molasses Grass (*Melinis minutiflora*) This medium African grass was observed on the LHS of Gold 4, with a characteristic pink flower head.

Moon Flower (*Ipomoea alba*) This herbaceous vine with conspicuous white flowers was observed near the lower dam on red 9.
