

Nutgrass (*Cyperus rotundus*) This African weed is abundant in gardens and turf areas.

Ochna (*Ochna serrulata*) This introduced Southern African shrub is a potentially noxious weed and was recently observed along the Riverbank on LHS Gold 3 tee-blocks. A flower close-up is provided below.

Petty Spurge (*Euphorbia peplus*) This small European annual herbaceous weed is only observed in the garden to the LHS of the Blue 3 tee-blocks during winter-spring. An extract from this species has been used in removing skin cancers.

Phasey Bean (*Macrotium lathyroides*) This Central American herbaceous weed is a legume introduced for fodder but widely naturalised. This specimen was recorded next to the pond on LHS Red 7 fairway.

Prairie Grass (*Bromus catharticus*) This low South American grass has only been observed in the Gold nine garden areas.

Prickly Acacia (*Vachellia nilotica*) This tall African shrub has only been observed in the Meiers Road car park.

Rattlepod (*Crotalaria lanceolata*) This Southern African small shrub was observed growing along the riverbank on the LHS of Red 5.

Red Caustic Weed (*Chamaesyce prostrata*) This prostrate Mediterranean herb (with close-up below) occurs in some garden areas and has a toxic milky sap.

Rhodes Grass (*Chloris gayana*) This clumping Southern African grass was observed on the RHS of the Blue 6 men's tee-block, above the Blue 5 green.

Soursob (*Oxalis pes-caprae*) This South African herb was observed in garden beds on the Gold mine.

Spear Thistle (*Cirsium vulgare*) This widespread herbaceous weed was observed as a group of young plants on the RHS of Blue 2 along the drain, and flowering (below) on the RHS of the Red 7 men's tee-block.

Tasselflower (*Emilia sonchifolia*) This Asian herb was observed at the base of a Slash Pine on Red 5.

Thickhead (*Crassocephalum crepidioides*) This herbaceous weed with pink daisy flowers was observed among some Grevillea shrubs on the RHS of Red 2 men's tee-block.

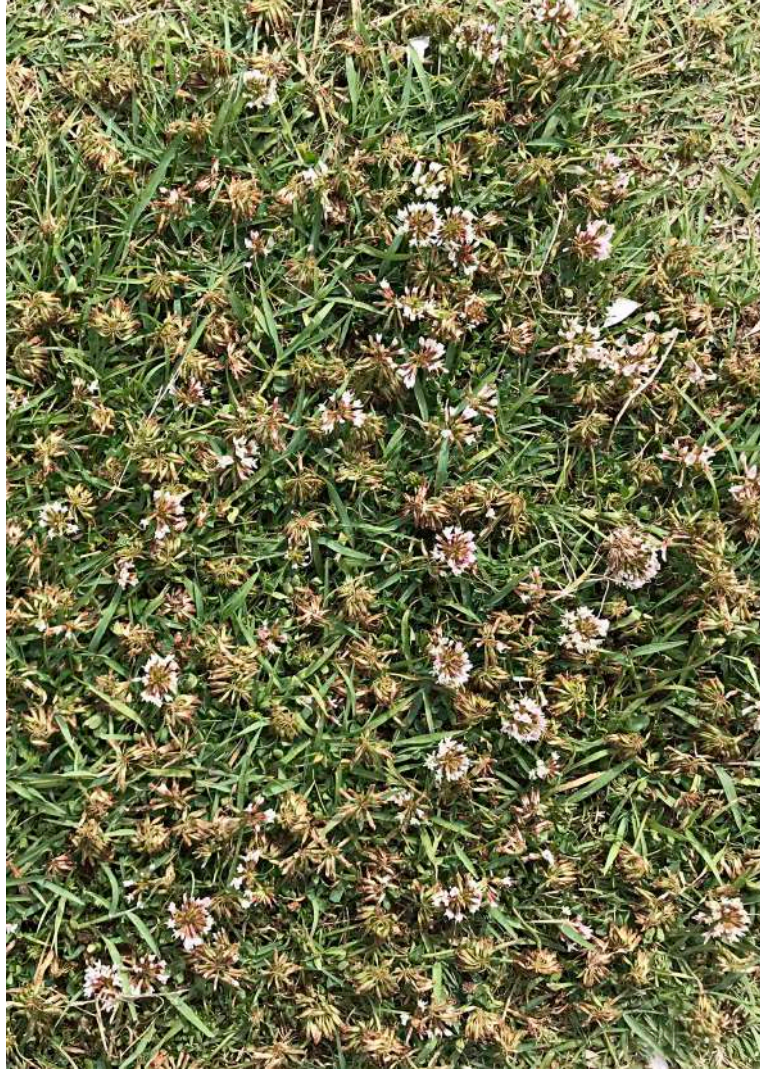

Tridax Daisy (*Tridax procumbens*) This herbaceous weed with white/cream daisy flowers was observed among some Grevillea shrubs on the LHS of Gold 4 fairway.

Water Primrose (*Ludwigia peploides*) This attractive South American aquatic weed can nevertheless choke waterways and displace native species. A flower close-up is provided below.

White Clover (*Trifolium repens*) This European weed of turfed areas is sometimes co-planted with grasses since it can fix nitrogen and thereby improve soil fertility. A close-up of the flowers is provided below. The flowers attract bees and can be hazardous if one is barefoot!

Wild Tobacco (*Solanum mauritianum*) This shrubby weed was observed on the LHS of Gold 8 men's tee-block, with flower close-up below .
